```
                   README for the 'morehype' bundle
                        Some more hypertext tools
                        (C) Uwe Lueck 2012/11/28

The bundle consists of three (or six) packages:

 'texlinks.sty'   shorthand macros for TeX-related external
                  hyperlinks with hyperref or 'blog.sty' below
                  or ...?

 'hypertoc.sty'   with hyperref, colorlinks=false rehabilitated
                  - struts in table of content macros
                  (and decent border colors in 'makedoc.cfg')

     'blog.sty'   fast generation of simple HTML by expanding
                  TeX macros (LaTeX names where possible), not
                  involving TeX's typesetting capabilities,
                  based on file processing with 'fifinddo.sty'
                  ('nicetext' bundle)

  'blogdot.sty'   beamer presentations with 'blog.sty'

 'blogexec.sty'   assignments and "ligatures" with 'blog.sty'

 'lnavicol.sty'   web pages with a left-hand navigation column,
                  based on 'blog.sty'
```

The packages are described in more detail in 'blog.pdf',
'hypertoc.pdf', and 'texlinks.pdf' ('doc' CTAN directory;
typeset using fifinddo.sty, makedoc.sty, niceverb.sty from the
'nicetext' bundle, http://ctan.org/pkg/nicetext).

'morehype' is author-maintained in the sense of LPPL below.

The files listed in 'SrcFILEs.txt' and the PDF files generated
from them can be redistributed and/or modified under the terms
of the LaTeX Project Public License; either version 1.3c of the
License, or any later version, see
