# tkz-doc.cls

AlterMundus

Alain Matthes

**tkzdoc.cls** is a class that allows me to make the documentation of my packages. If you want to use this class, it is better to analyze the source code first. This class is based on the class `scrartcl`. This class is designed to compile with `lualatex`. I added a single option: `cadre` which allows to add a frame on the cover. The class is completed with a `tkz-doc.cfg` file that allows to define the colors that will be used.
